

Frequently Asked Questions

What do Stage 1 Works include?

Stage 1 Works include:

- Relocation of flood light pole and LED upgrade;
- Realignment and drainage works to Myers No.1 and 2;
- Fitness stations with water stations;
- Covered tiered seating adjacent to Myers Park No.1;
- 2 active courts;
- Fencing around Myers Park; and
- Perimeter running track.

Why are Stage 1 works commencing before the Adamstown Park Masterplan is adopted?

Stage 1 works relate to a successful grant application prepared by Broadmeadow Magic Junior Football Club under the Greater Cities and Regional Sport Facility Fund 2021/22. These works are required to be completed this financial year to meet grant funding requirements.

The draft Adamstown Park Masterplan has been prepared in line with CN's Strategic Sports Plan (SSP), key sporting user groups and these grant funding works.

What are the differences between the draft Masterplan and stage 1 works?

Stage 1 works have been slightly amended following detailed design and a review of submissions received during the Masterplan process. This includes realignment of the footpath to improve amenity and avoid trees and existing services. The multi-purpose active court has also been split into 2 to provide one bat ball court and 1 half basketball court.

When will works commence and finish?

Works will commence in February 2023 and be completed by mid-2023.

What will be the impact to cricket?

The end of the season for cricket will be impacted as a result of the works and CN is working with cricket sporting groups to arrange alternative arrangements to minimise impact. The works will not reduce cricket boundary sizes.

Will the proposed works limit access to the park for public recreation?

There will be no changes to access to facilities. The fencing will have gates with no impact to access to the fields.

Frequently Asked Questions

When will the other proposed improvements as part of the Masterplan be undertaken?

The Masterplan aims to guide the future vision and renewal of infrastructure over the next 10-15 years.

Following a review of submissions the Masterplan will be finalised and adopted by Council in early 2023.

Adoption of the Masterplan will allow CN and key user groups to apply for further funding opportunities and future works to be included in Council capital works program over the life of the Masterplan.
